

CLAIMS:

What is claimed:

- 1 Medicament flavored to the pallet of bacteria to allure and kill the offending bacteria:  
Whereby (a) artificial flavors are bonded to active ingredient(s) in antibiotics or anti-infectives to attract and kill bacteria, or (b) natural flavors are bonded to active ingredient(s) in antibiotics or anti-infectives to attract and kill bacteria, or (c) combination of artificial and natural flavors are bonded to active ingredient(s) to attract and kill bacteria.
- 2 Flavor-bonded compounds which use flavor preferences to repel microorganisms and prevent or impede their growth and/or reproduction.
- 3 Flavored-bonded compounds developed to attract and kill microorganisms: including but not limited prokaryotes and eukaryotes.
